00:00:00.000 --> 00:00:02.490 Support for Yale Cancer Answers

NOTE Confidence: 0.8570453

 $00:00:02.490 \longrightarrow 00:00:04.980$ comes from AstraZeneca, dedicated

NOTE Confidence: 0.8570453

 $00:00:05.057 \longrightarrow 00:00:07.432$ to advancing options and providing

NOTE Confidence: 0.8570453

 $00:00:07.432 \longrightarrow 00:00:10.420$ hope for people living with cancer.

NOTE Confidence: 0.8570453

 $00:00:10.420 \longrightarrow 00:00:13.960$ More information at astrazeneca-us.com.

NOTE Confidence: 0.8570453

 $00:00:13.960 \longrightarrow 00:00:15.976$ Welcome to Yale Cancer Answers with

NOTE Confidence: 0.8570453

00:00:15.976 --> 00:00:18.575 your host doctor Anees Chagpar.

NOTE Confidence: 0.8570453

 $00{:}00{:}18.575 \dashrightarrow 00{:}00{:}20.560$ Yale Cancer Answers features the

NOTE Confidence: 0.8570453

 $00:00:20.560 \longrightarrow 00:00:22.958$ latest information on cancer care by

NOTE Confidence: 0.8570453

 $00:00:22.958 \longrightarrow 00:00:24.498$ welcoming oncologists and specialists

NOTE Confidence: 0.8570453

 $00:00:24.498 \longrightarrow 00:00:27.125$ who are on the forefront of the

NOTE Confidence: 0.8570453

 $00{:}00{:}27.125 \dashrightarrow 00{:}00{:}29.420$ battle to fight cancer. This week

NOTE Confidence: 0.8570453

 $00:00:29.420 \longrightarrow 00:00:31.300$ it's a conversation about medication

NOTE Confidence: 0.8570453

 $00{:}00{:}31.300 \dashrightarrow 00{:}00{:}32.804$ assistance programs with

NOTE Confidence: 0.8570453

 $00:00:32.810 \longrightarrow 00:00:34.230$ Nancy Beaulieu and Brenda Sepulveda.

00:00:34.230 --> 00:00:35.650 Nancy is associate director

NOTE Confidence: 0.8570453

 $00:00:35.650 \longrightarrow 00:00:37.330$ of oncology pharmacy services.

NOTE Confidence: 0.8570453

 $00:00:37.330 \longrightarrow 00:00:40.010$ And Brenda is

NOTE Confidence: 0.8570453

 $00:00:40.010 \longrightarrow 00:00:41.859$ medication Assistance program coordinator.

NOTE Confidence: 0.8570453

00:00:41.860 --> 00:00:44.404 Doctor Chagpar is a professor

NOTE Confidence: 0.8570453

 $00{:}00{:}44.404 \dashrightarrow 00{:}00{:}47.191$ of surgical oncology at the Yale

NOTE Confidence: 0.8570453

 $00{:}00{:}47.191 \dashrightarrow 00{:}00{:}49.199$ University School of Medicine.

00:00:49.660 --> 00:00:52.390 Nancy, maybe I'll start with you.

NOTE Confidence: 0.86842054

 $00:00:52.390 \longrightarrow 00:00:55.568$ Tell me a little bit more about

NOTE Confidence: 0.86842054

 $00:00:55.570 \longrightarrow 00:00:58.758$ yourself and what it is you do.

NOTE Confidence: 0.86842054

 $00:00:58.760 \longrightarrow 00:01:01.400$ We essentially mix chemotherapy and

NOTE Confidence: 0.86842054

 $00:01:01.400 \longrightarrow 00:01:04.040$ assure that all medication safety

NOTE Confidence: 0.86842054

 $00{:}01{:}04.118 \dashrightarrow 00{:}01{:}06.950$ practices are in order for all of our

NOTE Confidence: 0.86842054

 $00{:}01{:}06.950 \dashrightarrow 00{:}01{:}08.309$ patients within our

NOTE Confidence: 0.86842054

 $00:01:08.310 \longrightarrow 00:01:10.590$ network.

NOTE Confidence: 0.86842054

 $00:01:10.590 \longrightarrow 00:01:12.860$ Brenda, how about you?

 $00{:}01{:}12.860 \dashrightarrow 00{:}01{:}13.768$ I am the medication assistance program coordinator.

NOTE Confidence: 0.86842054

 $00:01:13.770 \longrightarrow 00:01:16.402$ I am part of a group that

NOTE Confidence: 0.86842054

 $00{:}01{:}16.402 \dashrightarrow 00{:}01{:}18.234$ assists patients with medication

NOTE Confidence: 0.86842054

 $00:01:18.234 \longrightarrow 00:01:20.730$ programs that require copay

NOTE Confidence: 0.86842054

00:01:20.730 --> 00:01:21.990 or foundation funding.

NOTE Confidence: 0.86842054

00:01:21.990 --> 00:01:23.250 So Nancy,

NOTE Confidence: 0.8682472

00:01:23.250 --> 00:01:27.030 from a big you know 30,000 foot picture,

NOTE Confidence: 0.8682472

 $00:01:27.030 \longrightarrow 00:01:29.655$ how often is it that patients actually

NOTE Confidence: 0.8682472

00:01:29.655 --> 00:01:32.488 have issues in paying for medications?

NOTE Confidence: 0.8682472

 $00:01:32.490 \longrightarrow 00:01:35.658$ I think that on this show we've

NOTE Confidence: 0.8682472

 $00{:}01{:}35.658 \dashrightarrow 00{:}01{:}38.368$ often talked about novel the rapies,

NOTE Confidence: 0.8682472

 $00:01:38.370 \longrightarrow 00:01:40.470$ the latest in clinical trials,

NOTE Confidence: 0.8682472

 $00:01:40.470 \longrightarrow 00:01:41.694$ new targeted drugs.

NOTE Confidence: 0.8682472

 $00:01:41.694 \longrightarrow 00:01:45.090$ But all of that comes at a cost.

NOTE Confidence: 0.8682472

 $00:01:45.090 \longrightarrow 00:01:48.030$ How much of a problem is it?

 $00:01:48.030 \longrightarrow 00:01:48.870$ The financial

NOTE Confidence: 0.8682472

 $00:01:48.870 \longrightarrow 00:01:51.462$ burden of many of the new

NOTE Confidence: 0.8682472

 $00:01:51.462 \longrightarrow 00:01:53.190$ medications that come out?

NOTE Confidence: 0.8682472

 $00:01:53.190 \longrightarrow 00:01:54.758$ All patients

NOTE Confidence: 0.8682472

00:01:54.758 --> 00:01:56.718 with long term chronic diseases,

NOTE Confidence: 0.8682472

 $00:01:56.718 \longrightarrow 00:01:58.676$ cancer included, have

NOTE Confidence: 0.8682472

 $00{:}01{:}58.676 \dashrightarrow 00{:}02{:}00.556$ significant stressors to deal with.

NOTE Confidence: 0.8682472

 $00:02:00.560 \longrightarrow 00:02:02.108$ They have emotional stress.

NOTE Confidence: 0.8682472

 $00{:}02{:}02{:}02{:}108 \dashrightarrow 00{:}02{:}04.043$ They have mental, physical stress,

NOTE Confidence: 0.8682472

 $00:02:04.050 \longrightarrow 00:02:06.264$ but one of the greatest stressors

NOTE Confidence: 0.8682472

 $00{:}02{:}06.264 \dashrightarrow 00{:}02{:}08.942$ that they deal with that's a burden

NOTE Confidence: 0.8682472

 $00:02:08.942 \longrightarrow 00:02:11.198$ not only to the patient themselves

NOTE Confidence: 0.8682472

 $00:02:11.198 \longrightarrow 00:02:14.071$ but also their family is the stress

NOTE Confidence: 0.8682472

00:02:14.071 --> 00:02:16.466 of the financial component of how

NOTE Confidence: 0.8682472

00:02:16.466 --> 00:02:19.182 they're going to pay for their therapy,

NOTE Confidence: 0.8682472

 $00:02:19.190 \longrightarrow 00:02:20.060$ their treatments.

 $00{:}02{:}20.060 \dashrightarrow 00{:}02{:}22.670$ Financial toxicity is a newer buzz

NOTE Confidence: 0.8682472

 $00:02:22.670 \longrightarrow 00:02:25.374$ term that we are using to describe

NOTE Confidence: 0.8682472

 $00:02:25.374 \longrightarrow 00:02:27.990$ the some of the financial side affects

NOTE Confidence: 0.8682472

 $00:02:27.990 \longrightarrow 00:02:30.348$ associated with the economic burden

NOTE Confidence: 0.8682472

 $00{:}02{:}30.348 \dashrightarrow 00{:}02{:}32.820$ of care and medications placed on

NOTE Confidence: 0.8682472

 $00:02:32.820 \longrightarrow 00:02:34.920$ these patients and their families.

NOTE Confidence: 0.8682472

 $00:02:34.920 \longrightarrow 00:02:37.936$ It is a significant issue and that is

NOTE Confidence: 0.8682472

 $00{:}02{:}37.936 \dashrightarrow 00{:}02{:}41.297$ one of the reasons why as long as

NOTE Confidence: 0.8682472

 $00{:}02{:}41.297 \dashrightarrow 00{:}02{:}44.483$ 12 years ago we went into developing

NOTE Confidence: 0.8682472

 $00:02:44.483 \longrightarrow 00:02:47.513$ a mechanism to assist patients with

NOTE Confidence: 0.8682472

 $00:02:47.520 \longrightarrow 00:02:50.040$ some of this financial burden.

NOTE Confidence: 0.87016577

00:02:50.040 --> 00:02:52.980 And just staying with you on that,

NOTE Confidence: 0.87016577

 $00:02:52.980 \longrightarrow 00:02:55.927$ I mean aren't many of

NOTE Confidence: 0.87016577

 $00{:}02{:}55.927 \dashrightarrow 00{:}02{:}58.141$ these the rapies covered by insurance

NOTE Confidence: 0.87016577

 $00:02:58.141 \longrightarrow 00:03:00.326$ or are people still having

00:03:00.330 --> 00:03:02.580 Financial hardship despite insurance?

NOTE Confidence: 0.8823548

 $00{:}03{:}02.580 \dashrightarrow 00{:}03{:}05.597$ We have many patients who have either

NOTE Confidence: 0.8823548

 $00{:}03{:}05.597 \dashrightarrow 00{:}03{:}07.895$ inadequate health care insurance or

NOTE Confidence: 0.8823548

 $00:03:07.895 \longrightarrow 00:03:10.205$ they have health care insurance

NOTE Confidence: 0.8823548

00:03:10.210 --> 00:03:13.549 but the out of pocket costs of many of

NOTE Confidence: 0.8823548

00:03:13.549 --> 00:03:16.692 these therapies can be extreme and a

NOTE Confidence: 0.8823548

 $00:03:16.692 \longrightarrow 00:03:20.090$ severe burden on their financial outcome.

NOTE Confidence: 0.8823548

 $00:03:20.090 \longrightarrow 00:03:21.882$ There are significant rising

NOTE Confidence: 0.8823548

 $00:03:21.882 \longrightarrow 00:03:23.226$ costs and medications.

NOTE Confidence: 0.8823548

 $00:03:23.230 \longrightarrow 00:03:26.366$ All new meds that do come out,

NOTE Confidence: 0.8823548

 $00{:}03{:}26.370 \dashrightarrow 00{:}03{:}29.346$ and certainly they provide hope for

NOTE Confidence: 0.8823548

 $00:03:29.346 \longrightarrow 00:03:31.600$ many patients, but they

NOTE Confidence: 0.8823548

 $00:03:31.600 \longrightarrow 00:03:33.490$ do come with a cost,

NOTE Confidence: 0.8823548

 $00:03:33.490 \longrightarrow 00:03:35.646$ and that is one of the things

NOTE Confidence: 0.8823548

00:03:35.646 --> 00:03:37.900 that we really need to work with.

NOTE Confidence: 0.8823548

 $00:03:37.900 \longrightarrow 00:03:40.546$ And we have been doing that

00:03:40.546 --> 00:03:42.310 for over 10 years.

NOTE Confidence: 0.8823548

00:03:42.310 --> 00:03:43.495 For our patients,

NOTE Confidence: 0.8823548

 $00:03:43.495 \longrightarrow 00:03:45.470$ both here and in the

NOTE Confidence: 0.8823548

00:03:45.470 --> 00:03:46.930 outpatient specialty pharmacy,

NOTE Confidence: 0.8823548

 $00:03:46.930 \longrightarrow 00:03:48.610$ they also have medication

NOTE Confidence: 0.8823548

 $00:03:48.610 \longrightarrow 00:03:49.870$ assistance program coordinators.

NOTE Confidence: 0.8823548

 $00:03:49.870 \longrightarrow 00:03:51.970$ Brenda tell us a little

NOTE Confidence: 0.8883406

 $00:03:51.970 \longrightarrow 00:03:54.490$ bit more about how that works.

NOTE Confidence: 0.8883406

00:03:54.490 --> 00:03:57.762 I mean, I can imagine that cancer patients

NOTE Confidence: 0.8883406

00:03:57.762 --> 00:04:00.789 are faced with a diagnosis of cancer,

NOTE Confidence: 0.8883406

 $00:04:00.790 \longrightarrow 00:04:03.310$ which is enough of a burden,

NOTE Confidence: 0.8883406

00:04:03.310 --> 00:04:04.903 physically, mentally, emotionally.

NOTE Confidence: 0.8883406

 $00:04:04.903 \longrightarrow 00:04:07.027$ And then

NOTE Confidence: 0.8883406

 $00:04:07.030 \longrightarrow 00:04:09.185$ their doctor prescribes a chemotherapy

NOTE Confidence: 0.8883406

 $00:04:09.185 \longrightarrow 00:04:11.340$ regimen or certain medications,

00:04:11.340 --> 00:04:14.788 and then whether they have insurance or not,

NOTE Confidence: 0.8883406

 $00:04:14.790 \longrightarrow 00:04:18.238$ they are faced with a rather large bill.

NOTE Confidence: 0.8883406

 $00:04:18.240 \longrightarrow 00:04:22.550$ So how do you help them to get around that?

NOTE Confidence: 0.8883406

 $00:04:22.550 \longrightarrow 00:04:24.992$ And is there a difference between

NOTE Confidence: 0.8883406

 $00:04:24.992 \longrightarrow 00:04:26.620$ the assistance that's available

NOTE Confidence: 0.8883406

00:04:26.690 --> 00:04:28.494 for uninsured patients versus

NOTE Confidence: 0.8883406

 $00:04:28.494 \longrightarrow 00:04:30.298$ the assistance that's available

NOTE Confidence: 0.8883406

 $00:04:30.298 \longrightarrow 00:04:32.459$ for people who have insurance

NOTE Confidence: 0.8883406

00:04:32.460 --> 00:04:36.065 but might not be adequate? 00:04:37.260 --> 00:04:39.100 And staying with that topic,

NOTE Confidence: 0.86583024

 $00:04:39.100 \longrightarrow 00:04:41.860$ we know that the financial burden

NOTE Confidence: 0.86583024

00:04:41.945 --> 00:04:44.417 is a big concern and part of what

NOTE Confidence: 0.86583024

 $00:04:44.417 \longrightarrow 00:04:47.545$ we do within our program is to

NOTE Confidence: 0.86583024

 $00:04:47.545 \longrightarrow 00:04:49.902$ ensure that the patient is able

NOTE Confidence: 0.86583024

 $00:04:49.902 \longrightarrow 00:04:52.098$ to remain on the preferred course

NOTE Confidence: 0.86583024

 $00:04:52.098 \longrightarrow 00:04:54.425$ of therapy while focusing on their

 $00:04:54.425 \longrightarrow 00:04:56.705$ health care journey and so for

NOTE Confidence: 0.86583024

 $00{:}04{:}56.781 \dashrightarrow 00{:}04{:}59.355$ the patients that are insured but

NOTE Confidence: 0.86583024

 $00:04:59.355 \longrightarrow 00:05:01.477$ maybe under insured because they

NOTE Confidence: 0.86583024

00:05:01.477 --> 00:05:03.859 still have high out of pockets,

NOTE Confidence: 0.86583024

 $00:05:03.860 \longrightarrow 00:05:05.900$ we assist with those copay

NOTE Confidence: 0.86583024

 $00:05:05.900 \longrightarrow 00:05:06.716$ assistance programs.

NOTE Confidence: 0.86583024

 $00{:}05{:}06.720 \dashrightarrow 00{:}05{:}09.075$ There are manufacturer sponsored Copay

NOTE Confidence: 0.86583024

00:05:09.075 --> 00:05:11.430 Foundation funding or replacement programs.

NOTE Confidence: 0.86583024

 $00:05:11.430 \longrightarrow 00:05:13.960$ There's a difference with the

NOTE Confidence: 0.86583024

 $00:05:13.960 \longrightarrow 00:05:16.975$ patient that is insured and also

NOTE Confidence: 0.86583024

 $00:05:16.975 \longrightarrow 00:05:20.103$ that has no insurance and so we will

NOTE Confidence: 0.86583024

 $00{:}05{:}20.103 \dashrightarrow 00{:}05{:}23.565$ go depending on what the status is

NOTE Confidence: 0.86583024

 $00:05:23.565 \longrightarrow 00:05:26.242$ to the preferred program to ensure

NOTE Confidence: 0.86583024

 $00:05:26.242 \longrightarrow 00:05:28.629$ that they are able to remain on

NOTE Confidence: 0.86583024

 $00:05:28.629 \longrightarrow 00:05:30.561$ that therapy without interruptions

NOTE Confidence: 0.86583024

 $00:05:30.561 \longrightarrow 00:05:33.585$ and without having to deplete their

 $00:05:33.585 \longrightarrow 00:05:35.990$ own personal income throughout

NOTE Confidence: 0.86583024

 $00:05:35.990 \longrightarrow 00:05:37.808$ their therapy journey.

NOTE Confidence: 0.8883741

 $00:05:37.920 \longrightarrow 00:05:40.232$ Tell me more about that, Brenda,

NOTE Confidence: 0.8883741

 $00:05:40.232 \longrightarrow 00:05:42.644$ because I'm sure that

NOTE Confidence: 0.8883741

00:05:42.644 --> 00:05:45.626 many of our listeners are really

NOTE Confidence: 0.8883741

 $00:05:45.626 \longrightarrow 00:05:47.878$ rather intrigued about how

NOTE Confidence: 0.8883741

 $00:05:47.880 \longrightarrow 00:05:49.528$ there is assistance available,

NOTE Confidence: 0.8883741

 $00:05:49.528 \longrightarrow 00:05:52.000$ so let's take the two examples.

NOTE Confidence: 0.8883741

 $00:05:52.000 \longrightarrow 00:05:55.064$ So the first is for people who have

NOTE Confidence: 0.8883741

 $00:05:55.064 \longrightarrow 00:05:58.176$ insurance but they are still under insured.

NOTE Confidence: 0.8883741

 $00:05:58.180 \longrightarrow 00:06:00.664$ Their out of pocket costs are

NOTE Confidence: 0.8883741

 $00:06:00.664 \longrightarrow 00:06:03.120$ too much for them to bear,

NOTE Confidence: 0.8883741

 $00:06:03.120 \longrightarrow 00:06:05.829$ so how do they access these programs

NOTE Confidence: 0.8883741

 $00:06:05.829 \longrightarrow 00:06:08.070$ and what programs are available?

NOTE Confidence: 0.8883741

 $00:06:08.070 \longrightarrow 00:06:10.536$ Would they cover all of their

00:06:10.536 --> 00:06:12.190 out of pocket costs?

NOTE Confidence: 0.8883741

 $00{:}06{:}12.190 \dashrightarrow 00{:}06{:}14.662$ You mentioned that these are programs

NOTE Confidence: 0.8883741

 $00:06:14.662 \longrightarrow 00:06:16.310$ available through the manufacturers.

NOTE Confidence: 0.8883741

 $00:06:16.310 \longrightarrow 00:06:20.398$ Can you tell us more about that?

NOTE Confidence: 0.8883741

 $00:06:20.400 \longrightarrow 00:06:22.770$ Sure, so patients are able

NOTE Confidence: 0.88529783

 $00{:}06{:}22.770 \dashrightarrow 00{:}06{:}24.482$ to access the manufacturer

NOTE Confidence: 0.88529783

 $00:06:24.482 \longrightarrow 00:06:27.050$ sponsored programs as soon as they

NOTE Confidence: 0.88529783

00:06:27.120 --> 00:06:29.176 identify what medications they're

NOTE Confidence: 0.88529783

 $00{:}06{:}29.176 \dashrightarrow 00{:}06{:}31.746$ having a financial concern with.

NOTE Confidence: 0.88529783

00:06:31.750 --> 00:06:34.552 Typically it can go through providers

NOTE Confidence: 0.88529783

 $00{:}06{:}34.552 \dashrightarrow 00{:}06{:}37.932$ where they will also have access to

NOTE Confidence: 0.88529783

 $00{:}06{:}37.932 \dashrightarrow 00{:}06{:}40.782$ this pharmacy services and will be

NOTE Confidence: 0.88529783

 $00{:}06{:}40.782 \dashrightarrow 00{:}06{:}44.098$ contacted to then do a little more

NOTE Confidence: 0.88529783

 $00{:}06{:}44.098 \dashrightarrow 00{:}06{:}46.415$ research within the manufacturer program.

NOTE Confidence: 0.88529783

00:06:46.415 --> 00:06:48.806 So someone who has insurance

NOTE Confidence: 0.88529783

 $00:06:48.806 \longrightarrow 00:06:50.270$ but is underinsured,

 $00:06:50.270 \longrightarrow 00:06:53.080$ means that they still have a high out

NOTE Confidence: 0.88529783

 $00{:}06{:}53.080 \rightarrow 00{:}06{:}55.910$ of pocket cost to that medication and

NOTE Confidence: 0.88529783

 $00:06:55.910 \longrightarrow 00:06:57.790$ this can occur many times

NOTE Confidence: 0.88529783

 $00:06:57.790 \longrightarrow 00:06:58.918$ within the treatment.

NOTE Confidence: 0.88529783

 $00:06:58.920 \longrightarrow 00:07:02.460$ So what we do is take care of the portion

NOTE Confidence: 0.88529783

 $00{:}07{:}02.460 \dashrightarrow 00{:}07{:}04.929$ that is pertaining to the medication.

NOTE Confidence: 0.88529783

00:07:04.930 --> 00:07:07.914 A lot of programs may allow the financial

NOTE Confidence: 0.88529783

 $00{:}07{:}07.914 \dashrightarrow 00{:}07{:}10.200$ eligibility to go towards other costs

NOTE Confidence: 0.8769117

 $00:07:10.200 \longrightarrow 00:07:11.244$ during that appointment,

NOTE Confidence: 0.8769117

00:07:11.244 --> 00:07:12.984 but typically will go geared

NOTE Confidence: 0.8769117

 $00:07:12.984 \longrightarrow 00:07:14.710$ towards the medication, and

NOTE Confidence: 0.8769117

 $00{:}07{:}14.710 \dashrightarrow 00{:}07{:}17.194$ that's our main focus because we

NOTE Confidence: 0.8769117

 $00:07:17.194 \longrightarrow 00:07:19.650$ know that that's where the out

NOTE Confidence: 0.8769117

00:07:19.650 --> 00:07:21.798 of pocket costs tends to fall under,

NOTE Confidence: 0.8769117

 $00:07:21.800 \longrightarrow 00:07:24.122$ and that's where it's mostly

 $00:07:24.122 \longrightarrow 00:07:27.470$ when it comes to the treatment.

NOTE Confidence: 0.8769117

 $00:07:27.470 \longrightarrow 00:07:30.060$ So for someone who is

NOTE Confidence: 0.8769117

00:07:30.060 --> 00:07:31.890 under insured or uninsured, then

NOTE Confidence: 0.8769117

 $00:07:31.890 \longrightarrow 00:07:34.370$ we will follow the same protocol.

NOTE Confidence: 0.8769117

 $00:07:34.370 \longrightarrow 00:07:37.380$ If there's a concern that's been extended

NOTE Confidence: 0.8769117

 $00:07:37.380 \dashrightarrow 00:07:40.635$ to the provider and we are aware of that,

NOTE Confidence: 0.8769117

 $00:07:40.640 \longrightarrow 00:07:42.404$ or the patient may have been

NOTE Confidence: 0.8769117

 $00{:}07{:}42.404 \dashrightarrow 00{:}07{:}44.216$ able to gather some information

NOTE Confidence: 0.8769117

 $00{:}07{:}44.216 \dashrightarrow 00{:}07{:}46.516$ through the manufacturer's website,

NOTE Confidence: 0.8769117

 $00:07:46.520 \longrightarrow 00:07:49.280$ then we go ahead and become sort of

NOTE Confidence: 0.8769117

 $00{:}07{:}49.280 \to 00{:}07{:}52.051$ a gateway for the patient in the

NOTE Confidence: 0.8769117

 $00:07:52.051 \longrightarrow 00:07:54.544$ programs and our providers to make

NOTE Confidence: 0.8769117

 $00:07:54.544 \longrightarrow 00:07:57.034$ sure that they are properly enrolled

NOTE Confidence: 0.8769117

 $00:07:57.034 \longrightarrow 00:07:59.480$ and that the process of submissions

NOTE Confidence: 0.8769117

 $00:07:59.480 \longrightarrow 00:08:01.880$ for those out of pocket costs

NOTE Confidence: 0.8769117

 $00:08:01.880 \longrightarrow 00:08:04.256$ are processed correctly and the patient

 $00{:}08{:}04.256 \dashrightarrow 00{:}08{:}06.945$ doesn't have to worry about any of

NOTE Confidence: 0.8769117

 $00{:}08{:}06.945 \longrightarrow 00{:}08{:}09.353$ that during the course of their therapy.

NOTE Confidence: 0.8769117

 $00:08:09.360 \longrightarrow 00:08:12.160$ So someone who is uninsured may be

NOTE Confidence: 0.8769117

 $00:08:12.160 \longrightarrow 00:08:15.059$ eligible to actually have access to

NOTE Confidence: 0.8769117

 $00:08:15.059 \longrightarrow 00:08:17.175$ the medication replacement programs

NOTE Confidence: 0.8769117

 $00:08:17.175 \longrightarrow 00:08:19.658$ through the insurance as well.

NOTE Confidence: 0.8769117

 $00:08:19.660 \longrightarrow 00:08:22.425$ By us having to go through the

NOTE Confidence: 0.8769117

 $00:08:22.425 \longrightarrow 00:08:23.610$ programs for the

NOTE Confidence: 0.89583015

 $00:08:23.610 \longrightarrow 00:08:24.624$ manufacturers.

NOTE Confidence: 0.89583015

 $00:08:24.624 \longrightarrow 00:08:26.990$ Nancy, it sounds like there are

NOTE Confidence: 0.89583015

 $00{:}08{:}27.048 \dashrightarrow 00{:}08{:}28.772$ some programs through manufacturers

NOTE Confidence: 0.89583015

 $00:08:28.772 \longrightarrow 00:08:30.927$ that patients can become familiar

NOTE Confidence: 0.89583015

00:08:30.927 --> 00:08:32.699 with through their website,

NOTE Confidence: 0.89583015

00:08:32.700 --> 00:08:35.070 but I'm just wondering how many

NOTE Confidence: 0.89583015

 $00:08:35.070 \longrightarrow 00:08:36.650$ patients actually

 $00:08:36.650 \longrightarrow 00:08:38.230$ have done the research,

NOTE Confidence: 0.89583015

 $00{:}08{:}38.230 \dashrightarrow 00{:}08{:}40.180$ have gone to manufacturers websites

NOTE Confidence: 0.89583015

 $00:08:40.180 \longrightarrow 00:08:42.984$ to figure out whether or not they

NOTE Confidence: 0.89583015

 $00:08:42.984 \longrightarrow 00:08:44.934$ would be eligible for assistance.

NOTE Confidence: 0.89583015

 $00{:}08{:}44.940 \dashrightarrow 00{:}08{:}48.100$ I mean, I'm not sure that if I was a

NOTE Confidence: 0.89583015

 $00:08:48.188 \dashrightarrow 00:08:52.044$ patient I would necessarily know to do that.

NOTE Confidence: 0.8881919

 $00:08:53.110 \longrightarrow 00:08:55.142$ I think that was one of

NOTE Confidence: 0.8881919

 $00:08:55.142 \longrightarrow 00:08:57.020$ the reasons for us to

NOTE Confidence: 0.8881919

 $00{:}08{:}57.094 \to 00{:}08{:}59.330$ actually develop this program,

NOTE Confidence: 0.8881919

 $00{:}08{:}59.330 \rightarrow 00{:}09{:}00.890$ because patients weren't aware,

NOTE Confidence: 0.8881919

 $00{:}09{:}00.890 \dashrightarrow 00{:}09{:}02.450$ it's not well publicized.

NOTE Confidence: 0.8881919

00:09:02.450 --> 00:09:04.778 If you go to the programs website,

 $00:09:07.890 \longrightarrow 00:09:09.835$ you can certainly see everyone

NOTE Confidence: 0.8881919

 $00{:}09{:}09.835 \dashrightarrow 00{:}09{:}11.780$ has a patient assistance tab.

NOTE Confidence: 0.8881919

 $00:09:11.780 \longrightarrow 00:09:14.210$ But quite often patients are unaware

NOTE Confidence: 0.8881919

 $00:09:14.210 \longrightarrow 00:09:17.706$ of that and that is why we chose to

00:09:17.706 --> 00:09:19.998 make it a formalized program and

NOTE Confidence: 0.8881919

 $00{:}09{:}19.998 \dashrightarrow 00{:}09{:}22.488$ not another burden on the patient

NOTE Confidence: 0.8881919

 $00:09:22.490 \longrightarrow 00:09:25.508$ for them to have to manage.

NOTE Confidence: 0.8881919

 $00:09:25.510 \longrightarrow 00:09:28.255$ We have currently 7 medication

NOTE Confidence: 0.8881919

 $00:09:28.255 \longrightarrow 00:09:29.902$ assistance program coordinators

NOTE Confidence: 0.8881919

 $00:09:29.902 \longrightarrow 00:09:32.542$ and over 16,000 currently enrolled

NOTE Confidence: 0.8881919

 $00:09:32.542 \longrightarrow 00:09:34.977$ active patients in the program

NOTE Confidence: 0.8881919

 $00:09:34.977 \longrightarrow 00:09:37.577$ that I oversee with my MAP

NOTE Confidence: 0.8881919

 $00:09:37.580 \longrightarrow 00:09:40.100$ program coordinators.

 $00{:}09{:}41.100 \dashrightarrow 00{:}09{:}43.956$ Brenda, it's great that there is this

NOTE Confidence: 0.87018806

 $00{:}09{:}43.956 \dashrightarrow 00{:}09{:}46.630$ program through the Smilow network,

NOTE Confidence: 0.87018806

 $00{:}09{:}46.630 \dashrightarrow 00{:}09{:}50.766$ but I'm just thinking about other

NOTE Confidence: 0.87018806

 $00:09:50.766 \longrightarrow 00:09:54.248$ patients who may be listening to this

NOTE Confidence: 0.87018806

 $00:09:54.250 \longrightarrow 00:09:57.442$ who may not be linked in to

NOTE Confidence: 0.87018806

 $00{:}09{:}57.442 \dashrightarrow 00{:}10{:}00.377$ the Smilow network if they were to

NOTE Confidence: 0.87018806

 $00:10:00.377 \longrightarrow 00:10:03.354$ go to the websites of all

 $00:10:03.354 \longrightarrow 00:10:06.034$ of the drugs that they are on and

NOTE Confidence: 0.87018806

 $00{:}10{:}06.040 \dashrightarrow 00{:}10{:}08.784$ I agree with you Nancy,

NOTE Confidence: 0.87018806

00:10:08.790 --> 00:10:11.934 that is yet another burden for patients,

NOTE Confidence: 0.87018806

00:10:11.940 --> 00:10:14.924 but can you give us a little bit

NOTE Confidence: 0.87018806

 $00:10:14.924 \longrightarrow 00:10:17.780$ of guidance in terms of

NOTE Confidence: 0.87018806

00:10:17.780 --> 00:10:19.400 who would be eligible?

NOTE Confidence: 0.87018806

 $00:10:19.400 \longrightarrow 00:10:21.758$ Are there certain income guidelines or

NOTE Confidence: 0.87018806

00:10:21.758 --> 00:10:23.774 certain employment guidelines?

NOTE Confidence: 0.87018806

 $00{:}10{:}23.774 \dashrightarrow 00{:}10{:}26.693$ How do these programs decide

NOTE Confidence: 0.87018806

00:10:26.700 --> 00:10:30.486 who gets assistance and who doesn't?

 $00:10:31.410 \longrightarrow 00:10:32.784$ With the programs,

NOTE Confidence: 0.85989547

 $00:10:32.784 \longrightarrow 00:10:35.532$ if a patient identifies that burden,

NOTE Confidence: 0.85989547

 $00:10:35.540 \longrightarrow 00:10:37.845$ and knows that there's something

NOTE Confidence: 0.85989547

 $00{:}10{:}37.845 \dashrightarrow 00{:}10{:}40.590$ there that they need assistance with,

NOTE Confidence: 0.85989547

 $00{:}10{:}40.590 \dashrightarrow 00{:}10{:}43.796$ and it's not within this community

NOTE Confidence: 0.85989547

 $00:10:43.800 \longrightarrow 00:10:46.470$ they can definitely ask for assistance

 $00:10:46.470 \longrightarrow 00:10:49.257$ with their providers or their

NOTE Confidence: 0.85989547

 $00{:}10{:}49.257 \dashrightarrow 00{:}10{:}52.053$ preferred office for their treatment area.

NOTE Confidence: 0.85989547

 $00:10:52.060 \longrightarrow 00:10:55.588$ What that does is that the manufacturer

NOTE Confidence: 0.85989547

 $00:10:55.588 \longrightarrow 00:10:58.807$ gives the information to the patient on

NOTE Confidence: 0.85989547

 $00:10:58.807 \longrightarrow 00:11:02.376$ how to go about the application process and

NOTE Confidence: 0.85989547

 $00{:}11{:}02.376 \dashrightarrow 00{:}11{:}05.538$ involving the providers office as well.

NOTE Confidence: 0.85989547

 $00:11:05.540 \longrightarrow 00:11:08.408$ So it's definitely geared to assist

NOTE Confidence: 0.85989547

00:11:08.408 --> 00:11:11.172 the patient and have the providers

NOTE Confidence: 0.85989547

 $00{:}11{:}11.172 \dashrightarrow 00{:}11{:}14.228$ office be able to be a part of

NOTE Confidence: 0.85989547

 $00:11:14.319 \longrightarrow 00:11:17.665$ that with the patient so that the

NOTE Confidence: 0.85989547

 $00{:}11{:}17.665 {\:{\mbox{--}}}{>} 00{:}11{:}19.506$ enrollment process is successful.

NOTE Confidence: 0.85989547

 $00:11:19.506 \longrightarrow 00:11:22.348$ A lot of the income criteria is

NOTE Confidence: 0.85989547

 $00:11:22.348 \longrightarrow 00:11:25.430$ based on whether there is employment,

NOTE Confidence: 0.85989547

 $00:11:25.430 \longrightarrow 00:11:27.685$ whether there is a retirement

NOTE Confidence: 0.85989547

 $00:11:27.685 \longrightarrow 00:11:29.038$ or household size.

NOTE Confidence: 0.85989547

 $00:11:29.040 \longrightarrow 00:11:32.264$ So a lot of the programs will have

00:11:32.264 --> 00:11:35.459 that kind of criteria for patients to

NOTE Confidence: 0.85989547

 $00:11:35.460 \longrightarrow 00:11:38.550$ be able to be eligible.

NOTE Confidence: 0.85989547

 $00:11:38.550 \longrightarrow 00:11:41.062$ As long as they're on that therapy

NOTE Confidence: 0.85989547

00:11:41.062 --> 00:11:43.255 income household size are some of

NOTE Confidence: 0.85989547

 $00{:}11{:}43.255 \to 00{:}11{:}45.729$ the things that they will look at.

NOTE Confidence: 0.85989547

00:11:45.730 --> 00:11:48.238 Especially true for people who are insured

NOTE Confidence: 0.85989547

 $00:11:48.240 \longrightarrow 00:11:50.340$ that the therapy has been approved

NOTE Confidence: 0.85989547

 $00{:}11{:}50.340 \longrightarrow 00{:}11{:}52.908$ by the insurance in order to proceed.

NOTE Confidence: 0.85989547

00:11:52.910 --> 00:11:55.060 If we're talking about copay assistance,

NOTE Confidence: 0.859262

00:11:56.730 --> 00:11:59.506 and Nancy back to you,

NOTE Confidence: 0.859262

 $00{:}11{:}59.510 --> 00{:}12{:}02.210 \text{ I'm just wondering,}$

NOTE Confidence: 0.859262

 $00:12:02.210 \longrightarrow 00:12:04.989$ there are people out there who are

NOTE Confidence: 0.859262

 $00{:}12{:}04.989 \dashrightarrow 00{:}12{:}07.095$ under insured, but they may be making

NOTE Confidence: 0.859262

 $00{:}12{:}07.095 \dashrightarrow 00{:}12{:}09.274$ the income or barely making the

NOTE Confidence: 0.859262

00:12:09.274 --> 00:12:11.284 income requirement such that they

00:12:11.284 --> 00:12:13.720 would not qualify for assistance,

NOTE Confidence: 0.859262

 $00:12:13.720 \longrightarrow 00:12:16.102$ but they may be doing that

NOTE Confidence: 0.859262

 $00:12:16.102 \longrightarrow 00:12:17.690$ by working three jobs,

NOTE Confidence: 0.859262

 $00:12:17.690 \longrightarrow 00:12:22.186$ and trying to make ends meet.

NOTE Confidence: 0.859262

 $00:12:22.190 \longrightarrow 00:12:24.926$ And so it kind of begs the question

NOTE Confidence: 0.859262

 $00:12:24.926 \longrightarrow 00:12:26.920$ when these patients are going

NOTE Confidence: 0.859262

 $00:12:26.920 \longrightarrow 00:12:29.783$ through cancer and they are

NOTE Confidence: 0.859262

 $00:12:29.867 \longrightarrow 00:12:32.459$ automatically in a situation where they

NOTE Confidence: 0.859262

 $00{:}12{:}32.459 \dashrightarrow 00{:}12{:}35.390$ may be losing some of that income.

NOTE Confidence: 0.859262

00:12:35.390 --> 00:12:37.390 But they are still quote employed,

00:12:39.038 --> 00:12:41.098 but especially if they were making

NOTE Confidence: 0.859262

00:12:41.098 --> 00:12:43.390 income based on an hourly wage.

NOTE Confidence: 0.859262

00:12:43.390 --> 00:12:46.190 So while they may have employment status,

NOTE Confidence: 0.859262

 $00:12:46.190 \longrightarrow 00:12:48.990$ and if the application said

NOTE Confidence: 0.859262

 $00:12:48.990 \longrightarrow 00:12:51.790$ show me what your income was in

NOTE Confidence: 0.859262

 $00:12:51.790 \longrightarrow 00:12:54.461$ the past year, they may have been

00:12:54.461 --> 00:12:57.521 scraping by with more than the

NOTE Confidence: 0.859262

 $00{:}12{:}57.521 \dashrightarrow 00{:}13{:}00.455$ bare minimum that's required for assistance.

NOTE Confidence: 0.859262

 $00:13:00.460 \longrightarrow 00:13:02.656$ Is it something that you advise

NOTE Confidence: 0.859262

00:13:02.656 --> 00:13:05.147 people to actually quit one of their

NOTE Confidence: 0.859262

00:13:05.147 --> 00:13:07.380 jobs or reduce their income so that

NOTE Confidence: 0.859262

 $00{:}13{:}07.453 \dashrightarrow 00{:}13{:}09.607$ they can avail themselves of this

NOTE Confidence: 0.859262

00:13:09.607 --> 00:13:12.112 assistance or how does that work?

NOTE Confidence: 0.9021661

00:13:25.110 --> 00:13:28.146 I think the first part of

NOTE Confidence: 0.9021661

 $00{:}13{:}28.146 \dashrightarrow 00{:}13{:}31.216$ that question that I'd like to

NOTE Confidence: 0.9021661

00:13:31.216 --> 00:13:34.492 address has to do with what the

NOTE Confidence: 0.9021661

 $00{:}13{:}34.500 \dashrightarrow 00{:}13{:}37.852$ income requirements are and

NOTE Confidence: 0.9021661

 $00:13:37.852 \longrightarrow 00:13:40.890$ historically, for many of these programs,

NOTE Confidence: 0.9021661

00:13:40.890 --> 00:13:43.530 the income requirement is quite high,

NOTE Confidence: 0.9021661

 $00:13:43.530 \longrightarrow 00:13:46.578$ so that should be of comfort

NOTE Confidence: 0.9021661

 $00:13:46.578 \longrightarrow 00:13:49.040$ to anyone who wants to

NOTE Confidence: 0.9021661

 $00{:}13{:}49.040 \dashrightarrow 00{:}13{:}50.840$ apply for these programs as

 $00:13:50.840 \longrightarrow 00:13:52.640$ well as continue to work.

NOTE Confidence: 0.9021661

 $00{:}13{:}52.640 \to 00{:}13{:}54.775$ Many of them are extremely high and

NOTE Confidence: 0.9021661

00:13:54.775 --> 00:13:57.244 I don't know how many patients

NOTE Confidence: 0.9021661

 $00:13:57.244 \longrightarrow 00:13:59.470$ currently that we have that don't

NOTE Confidence: 0.9021661

00:13:59.544 --> 00:14:01.998 get accepted because of their income,

NOTE Confidence: 0.9021661

 $00:14:02.000 \longrightarrow 00:14:05.600$ but the majority do get accepted.

NOTE Confidence: 0.9021661

00:14:05.600 --> 00:14:08.547 I guess I could say that I wouldn't

NOTE Confidence: 0.9021661

00:14:08.547 --> 00:14:11.186 recommend anyone quit a job unless that

NOTE Confidence: 0.9021661

 $00:14:11.186 \longrightarrow 00:14:13.668$ is their personal choice to do so.

NOTE Confidence: 0.9021661

00:14:13.670 --> 00:14:15.878 And a lot of our patients,

NOTE Confidence: 0.9021661

 $00:14:15.880 \longrightarrow 00:14:18.808$ if you are being treated for chronic disease,

NOTE Confidence: 0.9021661

 $00:14:18.810 \longrightarrow 00:14:21.070$ often have

NOTE Confidence: 0.9021661

 $00{:}14{:}21.070 \dashrightarrow 00{:}14{:}24.360$ issues with working anyway because

NOTE Confidence: 0.9021661

 $00:14:24.360 \longrightarrow 00:14:28.170$ you are in constant treatment and

00:14:28.998 --> 00:14:31.896 even if it's a temporary time frame,

NOTE Confidence: 0.9021661

 $00:14:31.900 \longrightarrow 00:14:35.204$ we can also petition these companies as well,

 $00:14:35.210 \longrightarrow 00:14:37.694$ or the patient can for exceptions

NOTE Confidence: 0.9021661

 $00{:}14{:}37.694 \dashrightarrow 00{:}14{:}40.433$ so their tax return last year may

NOTE Confidence: 0.9021661

 $00:14:40.433 \longrightarrow 00:14:43.341$ be far higher than it is this year

NOTE Confidence: 0.9021661

 $00:14:43.341 \longrightarrow 00:14:45.245$ because they unfortunately

NOTE Confidence: 0.9021661

00:14:45.245 --> 00:14:48.043 became ill and they they cannot

NOTE Confidence: 0.9021661

 $00:14:48.043 \longrightarrow 00:14:50.108$ hold their job any longer.

NOTE Confidence: 0.9021661

 $00:14:50.110 \longrightarrow 00:14:52.180$ So there are other options.

NOTE Confidence: 0.9021661

 $00:14:52.180 \longrightarrow 00:14:55.078$ There are also foundation programs as well,

NOTE Confidence: 0.9021661

 $00:14:55.080 \longrightarrow 00:14:58.188$ so the manufacturers are one.

NOTE Confidence: 0.9021661

 $00:14:58.190 \longrightarrow 00:15:00.120$ There are grant programs which

NOTE Confidence: 0.9021661

 $00{:}15{:}00.120 \dashrightarrow 00{:}15{:}02.050$ fall under the foundation category.

NOTE Confidence: 0.9021661

 $00:15:02.050 \longrightarrow 00:15:04.745$ That's another option as well for patients.

NOTE Confidence: 0.8563808

00:15:05.470 --> 00:15:06.974 All good information.

NOTE Confidence: 0.8563808

 $00:15:06.974 \longrightarrow 00:15:09.230$ We're going to pick up this

NOTE Confidence: 0.8563808

 $00:15:09.303 \longrightarrow 00:15:11.625$ conversation right after we take a

00:15:11.630 --> 00:15:13.660 short break for medical minute.

NOTE Confidence: 0.8563808

 $00{:}15{:}13.660 \dashrightarrow 00{:}15{:}15.690$ Support for Yale Cancer Answers

NOTE Confidence: 0.8563808

 $00:15:15.765 \longrightarrow 00:15:17.967$ comes from AstraZeneca, working to

NOTE Confidence: 0.8563808

00:15:17.967 --> 00:15:20.490 eliminate cancer as a cause of death.

NOTE Confidence: 0.8563808

 $00{:}15{:}20.490 \dashrightarrow 00{:}15{:}23.878$ Learn more at a strazeneca-us.com.

NOTE Confidence: 0.8563808

 $00:15:23.880 \longrightarrow 00:15:25.755$ This is a medical minute

NOTE Confidence: 0.8563808

 $00:15:25.755 \longrightarrow 00:15:26.880$ about colorectal cancer.

NOTE Confidence: 0.8563808

 $00:15:26.880 \longrightarrow 00:15:28.164$ When detected early,

NOTE Confidence: 0.8563808

 $00{:}15{:}28.164 \dashrightarrow 00{:}15{:}30.304$ colorectal cancer is easily treated

NOTE Confidence: 0.8563808

 $00:15:30.304 \longrightarrow 00:15:32.917$ and highly curable and as a result

NOTE Confidence: 0.8563808

 $00{:}15{:}32.917 \dashrightarrow 00{:}15{:}35.023$ it's recommended that men and women

NOTE Confidence: 0.8563808

 $00:15:35.023 \longrightarrow 00:15:37.438$ over the age of 45 have regular

NOTE Confidence: 0.8563808

 $00{:}15{:}37.438 \dashrightarrow 00{:}15{:}39.898$ colonoscopies to screen for the disease.

NOTE Confidence: 0.8563808

00:15:39.898 --> 00:15:42.108 Tumor gene analysis has helped

NOTE Confidence: 0.8563808

00:15:42.108 --> 00:15:44.151 improve management of colorectal

NOTE Confidence: 0.8563808

 $00:15:44.151 \longrightarrow 00:15:46.686$ cancer by identifying the patients

 $00:15:46.686 \longrightarrow 00:15:49.245$ most likely to benefit from

NOTE Confidence: 0.8563808

 $00{:}15{:}49.245 \dashrightarrow 00{:}15{:}51.700$ chemotherapy and newer targeted agents,

NOTE Confidence: 0.8563808

00:15:51.700 --> 00:15:53.600 resulting in more patient

NOTE Confidence: 0.8563808

 $00:15:53.600 \longrightarrow 00:15:54.550$ specific treatments.

NOTE Confidence: 0.8563808

 $00{:}15{:}54.550 \dashrightarrow 00{:}15{:}56.450$ More information is available

NOTE Confidence: 0.8563808

 $00:15:56.450 \longrightarrow 00:15:57.400$ at yale cancercenter.org.

NOTE Confidence: 0.8563808

00:15:57.400 --> 00:16:00.250 You're listening to Connecticut public radio.

NOTE Confidence: 0.8155958

 $00:16:02.550 \longrightarrow 00:16:04.880$ Welcome back to Yale Cancer Answers.

NOTE Confidence: 0.8155958

 $00{:}16{:}04.880 \dashrightarrow 00{:}16{:}07.028$ This is doctor Anees Chagpar

NOTE Confidence: 0.8155958

 $00:16:07.028 \longrightarrow 00:16:09.160$ and I'm joined tonight

NOTE Confidence: 0.8155958

 $00:16:09.160 \longrightarrow 00:16:11.110$ by my guests

NOTE Confidence: 0.8155958

 $00{:}16{:}11.110 \dashrightarrow 00{:}16{:}13.540$ Nancy Beaulieu and Brenda Sepulveda

NOTE Confidence: 0.8155958

 $00:16:13.540 \longrightarrow 00:16:16.010$ and we are talking about oncology pharmacy ser-

vices and particularly

NOTE Confidence: 0.8155958

 $00:16:16.010 \longrightarrow 00:16:18.644$ the financial toxicity that many patients

NOTE Confidence: 0.8155958

 $00:16:18.644 \longrightarrow 00:16:20.980$ face when undergoing cancer therapy.

 $00:16:20.980 \longrightarrow 00:16:23.290$ Right before the break we

NOTE Confidence: 0.8155958

 $00:16:23.290 \longrightarrow 00:16:25.476$ were talking about some financial

NOTE Confidence: 0.8155958

00:16:25.476 --> 00:16:27.760 assistance programs and Nancy,

NOTE Confidence: 0.8155958

 $00:16:27.760 \longrightarrow 00:16:31.225$ it was so great to hear that

NOTE Confidence: 0.8155958

 $00:16:31.230 \longrightarrow 00:16:34.416$ the income requirements

NOTE Confidence: 0.8155958

00:16:34.416 --> 00:16:37.519 for assistance are actually quite high,

NOTE Confidence: 0.8155958

 $00:16:37.520 \longrightarrow 00:16:41.984$ so if you are in financial distress

NOTE Confidence: 0.8155958

 $00:16:41.984 \longrightarrow 00:16:46.426$ when you get the bill for your medications,

NOTE Confidence: 0.8155958

 $00:16:46.430 \longrightarrow 00:16:50.408$ you can go to the

NOTE Confidence: 0.8155958

 $00:16:50.408 \longrightarrow 00:16:52.735$ pharmaceutical manufacturers website to

NOTE Confidence: 0.8155958

 $00{:}16{:}52.735 \to 00{:}16{:}56.907$ try to find a patient assistance program.

NOTE Confidence: 0.8155958

00:16:56.910 --> 00:16:59.565 Talk to your provider and

NOTE Confidence: 0.8155958

 $00{:}16{:}59.565 \dashrightarrow 00{:}17{:}02.720$ certainly at Smilow there is the

NOTE Confidence: 0.8155958

 $00{:}17{:}02.720 \dashrightarrow 00{:}17{:}05.530$ Medication assistance program that

NOTE Confidence: 0.8155958

 $00:17:05.530 \longrightarrow 00:17:08.858$ you mentioned. Brenda, my question to

00:17:08.858 --> 00:17:11.438 you is are all medications covered?

NOTE Confidence: 0.8155958

 $00:17:11.440 \longrightarrow 00:17:12.976$ So for example,

NOTE Confidence: 0.8155958

 $00:17:12.976 \longrightarrow 00:17:15.024$ are all chemotherapies covered?

NOTE Confidence: 0.8155958

00:17:15.030 --> 00:17:18.108 Does that only include IV therapies?

NOTE Confidence: 0.8155958

 $00:17:18.110 \longrightarrow 00:17:20.242$ What about oral therapies?

NOTE Confidence: 0.8155958

00:17:20.242 --> 00:17:22.907 Are there certain medications that

NOTE Confidence: 0.8155958

 $00:17:22.907 \longrightarrow 00:17:25.906$ don't have a patient assistance program

NOTE Confidence: 0.8155958

 $00:17:25.906 \longrightarrow 00:17:29.870$ like novel immunotherapies?

NOTE Confidence: 0.8155958

00:17:29.870 --> 00:17:32.920 What's included and what isn't?

 $00:17:33.330 \longrightarrow 00:17:35.940$ While there are hundreds of

NOTE Confidence: 0.8911614

 $00{:}17{:}35.940 \dashrightarrow 00{:}17{:}38.107$ medications that are covered and

NOTE Confidence: 0.8911614

 $00:17:38.107 \longrightarrow 00:17:40.536$ we often find a lot of eligible

NOTE Confidence: 0.8911614

 $00:17:40.536 \longrightarrow 00:17:43.148$ programs to assist our patients with,

NOTE Confidence: 0.8911614

 $00:17:43.150 \longrightarrow 00:17:45.774$ there will be some that will have some

NOTE Confidence: 0.8911614

 $00:17:45.774 \longrightarrow 00:17:48.867$ type of restrictions or some requirement.

NOTE Confidence: 0.8911614

 $00:17:48.870 \longrightarrow 00:17:51.702$ We find that a lot of the immuno

 $00:17:51.702 \longrightarrow 00:17:54.597$ therapies are eligible for these programs,

NOTE Confidence: 0.8911614

 $00{:}17{:}54.600 \dashrightarrow 00{:}17{:}56.670$ but it's really something that

NOTE Confidence: 0.8911614

00:17:56.670 --> 00:17:59.594 we will research and know at the

NOTE Confidence: 0.8911614

00:17:59.594 --> 00:18:01.544 time of the current treatment,

NOTE Confidence: 0.8911614

 $00:18:01.550 \longrightarrow 00:18:03.960$ so there will be other factors there

NOTE Confidence: 0.8911614

 $00:18:03.960 \longrightarrow 00:18:06.186$ that will have to look

NOTE Confidence: 0.8911614

00:18:06.186 --> 00:18:08.864 at and see if there's an eligibility

NOTE Confidence: 0.8911614

 $00:18:08.864 \longrightarrow 00:18:11.342$ requirement that will allow them to

NOTE Confidence: 0.8911614

 $00{:}18{:}11.412 \dashrightarrow 00{:}18{:}14.187$ participate in the manufacturer programs,

NOTE Confidence: 0.8911614

00:18:14.190 --> 00:18:15.822 but there's definitely hundreds

NOTE Confidence: 0.8911614

 $00{:}18{:}15.822 \dashrightarrow 00{:}18{:}17.862$ of programs available for the

NOTE Confidence: 0.8774376

 $00:18:17.870 \longrightarrow 00:18:20.726$ chemotherapies.

NOTE Confidence: 0.8774376

 $00:18:20.730 \longrightarrow 00:18:23.250$ Nancy, is this something that is

NOTE Confidence: 0.8774376

00:18:23.250 --> 00:18:25.260 discussed with the patient and

NOTE Confidence: 0.8774376

 $00:18:25.260 \longrightarrow 00:18:27.405$ the provider before the provider

NOTE Confidence: 0.8774376

 $00:18:27.405 \longrightarrow 00:18:29.320$ makes a treatment regimen?

 $00:18:29.320 \longrightarrow 00:18:32.098$ Or is this something that the

NOTE Confidence: 0.8774376

 $00{:}18{:}32.098 \dashrightarrow 00{:}18{:}34.509$ patients are then scrambling to do

NOTE Confidence: 0.8774376

 $00:18:34.510 \longrightarrow 00:18:36.580$ after the provider has written

NOTE Confidence: 0.8774376

 $00:18:36.580 \longrightarrow 00:18:38.236$ out their recommended treatment?

NOTE Confidence: 0.9007538

 $00:18:40.790 \longrightarrow 00:18:43.260$ The providers generally write out

NOTE Confidence: 0.9007538

 $00:18:43.260 \longrightarrow 00:18:45.236$ what's recommended because that

NOTE Confidence: 0.9007538

 $00:18:45.236 \longrightarrow 00:18:48.547$ is where we want to go with the

NOTE Confidence: 0.9007538

 $00:18:48.547 \longrightarrow 00:18:50.670$ therapeutic direction for the patient.

NOTE Confidence: 0.9007538

00:18:50.670 --> 00:18:51.846 After that, however,

NOTE Confidence: 0.9007538

 $00:18:51.846 \longrightarrow 00:18:55.101$ quite often we have to assure that the

NOTE Confidence: 0.9007538

 $00{:}18{:}55.101 \dashrightarrow 00{:}18{:}58.153$ patient's medications are going to be covered.

NOTE Confidence: 0.9007538

 $00:18:58.160 \longrightarrow 00:19:00.240$ That's the first step.

NOTE Confidence: 0.9007538

 $00{:}19{:}00.240 \dashrightarrow 00{:}19{:}03.152$ If a patient is insured and if

NOTE Confidence: 0.9007538

 $00:19:03.152 \longrightarrow 00:19:05.692$ we get denials, then we step in.

NOTE Confidence: 0.9007538

 $00:19:05.692 \longrightarrow 00:19:08.189$ We do have what's called a medication

 $00:19:08.189 \longrightarrow 00:19:10.594$ assistance program brochure that we

NOTE Confidence: 0.9007538

 $00:19:10.594 \longrightarrow 00:19:14.307$ provide in all of our offices so they

NOTE Confidence: 0.9007538

 $00:19:14.307 \longrightarrow 00:19:16.875$ are available to patients before they

NOTE Confidence: 0.9007538

 $00:19:16.880 \longrightarrow 00:19:21.437$ ever even go into the physician practice.

NOTE Confidence: 0.9007538

 $00:19:21.440 \longrightarrow 00:19:25.160$ Many times the

NOTE Confidence: 0.9007538

00:19:25.160 --> 00:19:27.280 program coordinators are working

NOTE Confidence: 0.9007538

 $00:19:27.280 \longrightarrow 00:19:29.400$ on the back end,

NOTE Confidence: 0.9007538

00:19:29.400 --> 00:19:34.146 so in our program we work with

NOTE Confidence: 0.9007538

00:19:34.150 --> 00:19:38.010 determining how much of a

NOTE Confidence: 0.9007538

 $00:19:38.010 \longrightarrow 00:19:40.410$ bill that the patient may have

NOTE Confidence: 0.9007538

 $00{:}19{:}40.410 \dashrightarrow 00{:}19{:}42.490$ once insurance has gone through

NOTE Confidence: 0.9007538

 $00:19:42.490 \longrightarrow 00:19:45.339$ and then we go and pinpoint certain

NOTE Confidence: 0.9007538

00:19:45.339 --> 00:19:47.319 programs for those patients.

NOTE Confidence: 0.9007538

 $00:19:47.320 \longrightarrow 00:19:49.762$ We actually have a software that

NOTE Confidence: 0.9007538

00:19:49.762 --> 00:19:52.338 assists us with that as well

NOTE Confidence: 0.9007538

 $00:19:52.338 \longrightarrow 00:19:54.078$ in the general population.

00:19:54.080 --> 00:19:56.200 Again, as you had mentioned,

NOTE Confidence: 0.9007538

 $00{:}19{:}56.200 \dashrightarrow 00{:}19{:}58.310$ patients can go to websites.

NOTE Confidence: 0.9007538

00:19:58.310 --> 00:20:00.848 Always include your provider on what

NOTE Confidence: 0.9007538

 $00:20:00.850 \longrightarrow 00:20:03.594$ forms you have filled out to

NOTE Confidence: 0.9007538

 $00:20:03.594 \longrightarrow 00:20:05.930$ make sure there's not

NOTE Confidence: 0.9007538

 $00:20:05.930 \longrightarrow 00:20:08.040$ duplicative work going on there,

NOTE Confidence: 0.9007538

 $00:20:08.040 \longrightarrow 00:20:12.128$ which has happened to us in the past.

NOTE Confidence: 0.9007538

 $00:20:12.130 \longrightarrow 00:20:14.699$ So that these patients can get the

NOTE Confidence: 0.9007538

00:20:14.699 --> 00:20:17.253 most out of these programs.

NOTE Confidence: 0.9007538

 $00:20:17.253 \longrightarrow 00:20:20.428$ To do a little bit of a spin in regards

NOTE Confidence: 0.9007538

 $00{:}20{:}20{:}428 \dashrightarrow 00{:}20{:}23.018$ to your previous question about

NOTE Confidence: 0.9007538

00:20:23.018 --> 00:20:25.741 availability and drugs that have programs,

NOTE Confidence: 0.9007538

 $00:20:25.741 \longrightarrow 00:20:28.063$ what we find is anything that

NOTE Confidence: 0.9007538

 $00:20:28.063 \longrightarrow 00:20:30.388$ is new and highly expensive.

NOTE Confidence: 0.9007538

00:20:30.390 --> 00:20:32.470 Definitely have patient assistance programs.

 $00:20:32.470 \longrightarrow 00:20:36.187$ Many of the older therapies that are.

NOTE Confidence: 0.9007538

00:20:36.190 --> 00:20:39.046 Generic at this point may not.

NOTE Confidence: 0.9007538

 $00:20:39.050 \longrightarrow 00:20:42.032$ It's really focused quite often on the

NOTE Confidence: 0.9007538

00:20:42.032 --> 00:20:45.249 higher cost or higher end medications,

NOTE Confidence: 0.9007538

 $00:20:45.250 \longrightarrow 00:20:47.635$ and there are definitely medication

NOTE Confidence: 0.9007538

 $00:20:47.635 \longrightarrow 00:20:50.020$ assistance programs for oral medications.

NOTE Confidence: 0.9007538

 $00:20:50.020 \longrightarrow 00:20:53.156$ Even at your

NOTE Confidence: 0.9007538

00:20:53.156 --> 00:20:55.692 local CVS or Walgreens patients

NOTE Confidence: 0.9007538

 $00{:}20{:}55.692 \dashrightarrow 00{:}20{:}58.457$ should always be asking what's

NOTE Confidence: 0.9007538

 $00:20:58.457 \longrightarrow 00:21:00.990$ out there to assist them.

NOTE Confidence: 0.9007538

 $00:21:00.990 \longrightarrow 00:21:03.375$ If they can't afford any

NOTE Confidence: 0.9007538

 $00{:}21{:}03.375 \dashrightarrow 00{:}21{:}05.760$ medication that they may need.

NOTE Confidence: 0.8415599

 $00:21:06.530 \longrightarrow 00:21:10.114$ And so when you determine

NOTE Confidence: 0.8415599

00:21:10.114 --> 00:21:14.208 upfront what the cost of therapy would be,

NOTE Confidence: 0.8415599

 $00:21:14.210 \longrightarrow 00:21:17.282$ is that done before the therapy

NOTE Confidence: 0.8415599

 $00:21:17.282 \longrightarrow 00:21:20.850$ actually starts?

 $00:21:20.850 \longrightarrow 00:21:23.670$ Brenda are you intervening before

NOTE Confidence: 0.8415599

00:21:23.670 --> 00:21:26.199 a treatment starts to say OK,

NOTE Confidence: 0.8415599

 $00:21:26.200 \longrightarrow 00:21:29.315$ this is what the cost would be.

NOTE Confidence: 0.8415599

00:21:29.320 --> 00:21:32.888 Can you afford it or can you not?

NOTE Confidence: 0.8415599

 $00:21:32.890 \longrightarrow 00:21:35.851$ Can we get all of these programs

NOTE Confidence: 0.8415599

 $00:21:35.851 \longrightarrow 00:21:38.049$ and the applications into

NOTE Confidence: 0.8415599

 $00:21:38.049 \longrightarrow 00:21:40.164$ assistance before you start so

NOTE Confidence: 0.8415599

 $00:21:40.164 \longrightarrow 00:21:43.433$ that the damage is

NOTE Confidence: 0.8415599

 $00:21:43.433 \longrightarrow 00:21:45.828$ going to be financially afterwards?

NOTE Confidence: 0.8415599

 $00:21:45.830 \longrightarrow 00:21:48.920$ Or is this something that is

NOTE Confidence: 0.8415599

 $00:21:48.920 \longrightarrow 00:21:50.980$ kind of being done

NOTE Confidence: 0.8415599

 $00:21:50.980 \longrightarrow 00:21:52.710$ after I've already started therapy

NOTE Confidence: 0.8415599

00:21:52.710 --> 00:21:55.331 and in tandem with that so that I

NOTE Confidence: 0.8415599

 $00:21:55.331 \longrightarrow 00:21:56.981$ don't really have a choice except

NOTE Confidence: 0.8415599

 $00:21:56.981 \longrightarrow 00:21:58.806$ to hope that I get accepted.

00:22:00.930 --> 00:22:02.049 Typically, as Nancy

NOTE Confidence: 0.8547436

 $00:22:02.050 \longrightarrow 00:22:03.905$ mentioned, once the treatment plan

NOTE Confidence: 0.8547436

 $00:22:03.905 \longrightarrow 00:22:06.509$ is in place by the provider,

NOTE Confidence: 0.8547436

 $00:22:06.510 \longrightarrow 00:22:08.918$ and we know that this is the

NOTE Confidence: 0.8547436

00:22:08.918 --> 00:22:10.600 preferred course of therapy,

NOTE Confidence: 0.8547436

 $00:22:10.600 \longrightarrow 00:22:13.672$ it's going to undergo that if there's an

NOTE Confidence: 0.8547436

 $00:22:13.672 \longrightarrow 00:22:15.808$ insurance involvement or lack of insurance,

NOTE Confidence: 0.8547436

00:22:15.810 --> 00:22:18.407 it'll go through that process of referral,

NOTE Confidence: 0.8547436

 $00:22:18.410 \longrightarrow 00:22:21.018$ and that will sort of let us know

NOTE Confidence: 0.8547436

00:22:21.018 --> 00:22:23.988 when we necessarily need to step in,

NOTE Confidence: 0.8547436

 $00{:}22{:}23.990 \dashrightarrow 00{:}22{:}27.105$ and if there will be high cost

NOTE Confidence: 0.8547436

 $00:22:27.105 \longrightarrow 00:22:30.298$ towards the treatment plan.

NOTE Confidence: 0.8547436

 $00{:}22{:}30.300 \dashrightarrow 00{:}22{:}33.148$ We do have our own software where we

NOTE Confidence: 0.8547436

 $00{:}22{:}33.148 \to 00{:}22{:}37.195$ on the back end try to capture as many

NOTE Confidence: 0.8547436

00:22:37.195 --> 00:22:40.328 patients beforehand, when this isn't possible,

NOTE Confidence: 0.8547436

 $00:22:40.330 \longrightarrow 00:22:43.078$ what's great about the programs is

 $00:22:43.078 \longrightarrow 00:22:46.213$ that some of them have look back

NOTE Confidence: 0.8547436

 $00:22:46.213 \longrightarrow 00:22:49.048$ periods that go up to 180 days.

NOTE Confidence: 0.8547436

 $00:22:49.050 \longrightarrow 00:22:51.660$ So even if a patient has

NOTE Confidence: 0.8547436

 $00:22:51.660 \longrightarrow 00:22:52.965$ initiated the treatment,

NOTE Confidence: 0.8547436

 $00:22:52.970 \longrightarrow 00:22:55.652$ there's still time for enrollment and

NOTE Confidence: 0.8547436

00:22:55.652 --> 00:22:58.912 to capture that date of service that

NOTE Confidence: 0.8547436

 $00:22:58.912 \longrightarrow 00:23:01.690$ was already served or infused

NOTE Confidence: 0.8547436

 $00:23:01.690 \longrightarrow 00:23:04.066$ prior to the enrollment for the

NOTE Confidence: 0.865916

 $00:23:04.070 \longrightarrow 00:23:05.654$ programs.

NOTE Confidence: 0.865916

00:23:05.654 --> 00:23:08.030 Nancy, my question is,

NOTE Confidence: 0.865916

 $00{:}23{:}08.030 \dashrightarrow 00{:}23{:}10.184$ it's great that there's a look

NOTE Confidence: 0.865916

00:23:10.184 --> 00:23:12.079 back program in that maybe

NOTE Confidence: 0.865916

00:23:12.079 --> 00:23:14.788 you'll be able to apply for that

NOTE Confidence: 0.865916

 $00:23:14.788 \longrightarrow 00:23:16.340$ assistance going backwards.

NOTE Confidence: 0.865916

00:23:16.340 --> 00:23:18.716 But what if, even with assistance,

 $00:23:18.720 \longrightarrow 00:23:21.708$ it is still too expensive?

 $00{:}23{:}22.942 \dashrightarrow 00{:}23{:}24.790$ One would anticipate that

NOTE Confidence: 0.865916

 $00{:}23{:}24.863 \dashrightarrow 00{:}23{:}26.898$ making all of those applications

NOTE Confidence: 0.865916

00:23:26.898 --> 00:23:28.933 to these pharma companies and

NOTE Confidence: 0.865916

 $00:23:29.002 \longrightarrow 00:23:31.158$ getting all of the

NOTE Confidence: 0.865916

 $00:23:31.158 \longrightarrow 00:23:33.128$ T's crossed and I's dotted to

NOTE Confidence: 0.865916

00:23:33.128 --> 00:23:34.858 get assistance takes some time.

NOTE Confidence: 0.865916

00:23:34.860 --> 00:23:35.770 So meanwhile,

NOTE Confidence: 0.865916

 $00{:}23{:}35.770 \dashrightarrow 00{:}23{:}37.590$ you're starting the rapy without

NOTE Confidence: 0.865916

00:23:37.590 --> 00:23:39.410 knowing whether you're going

NOTE Confidence: 0.865916

00:23:39.471 --> 00:23:41.091 to get assistance and how much

NOTE Confidence: 0.865916

 $00:23:41.091 \longrightarrow 00:23:43.158$ and so at the end of the day,

NOTE Confidence: 0.865916

 $00:23:43.160 \longrightarrow 00:23:45.928$ you may still be left with the bill.

NOTE Confidence: 0.865916

 $00:23:45.930 \longrightarrow 00:23:47.242$ On the other hand,

NOTE Confidence: 0.865916

 $00:23:47.242 \longrightarrow 00:23:49.698$ if you try to apply for all

NOTE Confidence: 0.865916

 $00:23:49.698 \longrightarrow 00:23:51.718$ of the assistance up front,

00:23:51.720 --> 00:23:53.220 you're now delaying your treatment,

NOTE Confidence: 0.865916

 $00:23:53.220 \longrightarrow 00:23:57.108$ and it's kind of a bit of a tug.

NOTE Confidence: 0.865916

00:23:57.110 --> 00:23:58.610 How do you work

NOTE Confidence: 0.86207634

 $00:23:58.610 \longrightarrow 00:24:01.214$ around that?

NOTE Confidence: 0.86207634

 $00:24:01.220 \longrightarrow 00:24:03.922$ The way we process treatment plan orders

NOTE Confidence: 0.86207634

 $00{:}24{:}03.922 \dashrightarrow 00{:}24{:}06.199$ once the physician decides what the

NOTE Confidence: 0.86207634

 $00:24:06.199 \longrightarrow 00:24:09.079$ best course of therapy is, they go to

NOTE Confidence: 0.86207634

00:24:09.079 --> 00:24:11.317 what's called a patient account Rep.

NOTE Confidence: 0.86207634

 $00{:}24{:}11.320 \dashrightarrow 00{:}24{:}13.190$ That person does an insurance

NOTE Confidence: 0.86207634

 $00:24:13.190 \longrightarrow 00:24:15.060$ verification on the patient's therapy.

NOTE Confidence: 0.86207634

 $00{:}24{:}15.060 \mathrel{--}{>} 00{:}24{:}16.930$ So before a patient gets treated,

NOTE Confidence: 0.86207634

 $00:24:16.930 \longrightarrow 00:24:20.050$ they have to have a pre

NOTE Confidence: 0.86207634

 $00:24:20.050 \longrightarrow 00:24:22.130$ certification of those meds.

NOTE Confidence: 0.86207634

 $00{:}24{:}22.130 \longrightarrow 00{:}24{:}24.405$ If, for example, an insurance says no,

NOTE Confidence: 0.86207634

00:24:24.410 --> 00:24:26.468 we're not paying for a certain Med

NOTE Confidence: 0.86207634

 $00{:}24{:}26.468 \dashrightarrow 00{:}24{:}29.299$ that is a trigger for the MAP program.

 $00:24:29.300 \longrightarrow 00:24:31.225$ All of the providers are fully well

NOTE Confidence: 0.86207634

 $00{:}24{:}31.225 \dashrightarrow 00{:}24{:}33.539$ aware of our MAP program coordinators,

NOTE Confidence: 0.86207634

 $00:24:33.540 \longrightarrow 00:24:35.626$ and they know that they can reach

NOTE Confidence: 0.86207634

00:24:35.626 --> 00:24:37.779 out if they think this

NOTE Confidence: 0.86207634

 $00{:}24{:}37.780 \dashrightarrow 00{:}24{:}39.370$ patient needs a specific

NOTE Confidence: 0.86207634

 $00:24:39.370 \longrightarrow 00:24:41.677$ drug they will reach out to the

NOTE Confidence: 0.86207634

00:24:41.677 --> 00:24:43.317 MAP program coordinator and say,

NOTE Confidence: 0.86207634

 $00:24:43.320 \longrightarrow 00:24:45.276$ hey this got denied by insurance.

NOTE Confidence: 0.86207634

 $00:24:45.280 \longrightarrow 00:24:47.604$ Can you help and those are some

NOTE Confidence: 0.86207634

 $00:24:47.604 \longrightarrow 00:24:49.510$ of the routes we go down,

NOTE Confidence: 0.86207634

 $00:24:49.510 \longrightarrow 00:24:51.220$ but in patients whose insurance

NOTE Confidence: 0.86207634

00:24:51.220 --> 00:24:53.150 companies say they're not going to,

 $00:24:54.570 \longrightarrow 00:24:56.130$ we'll know upfront before they

NOTE Confidence: 0.86207634

 $00:24:56.130 \longrightarrow 00:24:57.066$ ever get treated.

NOTE Confidence: 0.87484753

 $00:24:59.500 \longrightarrow 00:25:04.228$ When we enroll patients in the MAP programs

NOTE Confidence: 0.87484753

 $00:25:04.230 \longrightarrow 00:25:06.240$ that is usually an acceptance,

 $00:25:06.240 \longrightarrow 00:25:08.490$ or at least the coordinator knows

NOTE Confidence: 0.87484753

 $00{:}25{:}08.490 \dashrightarrow 00{:}25{:}10.660$ that the patient meets criteria.

NOTE Confidence: 0.87484753

 $00:25:10.660 \longrightarrow 00:25:13.508$ So there is some level of comfort there

NOTE Confidence: 0.87484753

 $00:25:13.508 \longrightarrow 00:25:16.368$ that that person will get into that

NOTE Confidence: 0.87484753

 $00{:}25{:}16.368 \dashrightarrow 00{:}25{:}19.100$ program before they start being treated.

NOTE Confidence: 0.87484753

00:25:19.100 --> 00:25:21.940 Some of the programs we actually have to

NOTE Confidence: 0.87484753

 $00:25:21.940 \longrightarrow 00:25:24.816$ treat the patient first, have the insurance

NOTE Confidence: 0.87484753

 $00{:}25{:}24.816 \dashrightarrow 00{:}25{:}27.550$ deny the bill before the program.

NOTE Confidence: 0.87484753

00:25:27.550 --> 00:25:30.532 One of the ways we get assistance

NOTE Confidence: 0.87484753

 $00:25:30.532 \longrightarrow 00:25:33.247$ is they actually send us the

NOTE Confidence: 0.87484753

00:25:33.247 --> 00:25:35.047 physical drug vials back

NOTE Confidence: 0.87484753

 $00:25:35.050 \longrightarrow 00:25:37.927$ to replenish our supply so the patient

NOTE Confidence: 0.87484753

 $00:25:37.927 \longrightarrow 00:25:41.067$ never gets billed for that particular drug,

NOTE Confidence: 0.87484753

 $00:25:41.070 \longrightarrow 00:25:43.220$ so that's another way there's

NOTE Confidence: 0.87484753

 $00:25:43.220 \longrightarrow 00:25:44.940$ copay assistance where they

 $00:25:44.940 \longrightarrow 00:25:47.090$ actually assist with insured copay.

NOTE Confidence: 0.87484753

 $00:25:47.090 \longrightarrow 00:25:49.874$ There's also the medication vial assistance

NOTE Confidence: 0.87484753

 $00:25:49.874 \longrightarrow 00:25:52.557$ where the actual physical drug gets

NOTE Confidence: 0.87484753

00:25:52.557 --> 00:25:54.825 replaced after the patient gets it,

NOTE Confidence: 0.87484753

 $00:25:54.830 \longrightarrow 00:25:56.550$ and is insurance denied.

NOTE Confidence: 0.87484753

 $00:25:56.550 \longrightarrow 00:25:57.840$ Yeah, but that

NOTE Confidence: 0.8357259

00:25:57.840 --> 00:26:00.904 must be scary for the patient to you

NOTE Confidence: 0.8357259

00:26:00.904 --> 00:26:03.629 know now gets their insurance denied

NOTE Confidence: 0.8357259

 $00:26:03.629 \longrightarrow 00:26:08.066$ and are thinking Oh my God, am I

NOTE Confidence: 0.8357259

 $00:26:08.066 \longrightarrow 00:26:11.318$ responsible for that cost.

NOTE Confidence: 0.8357259

 $00:26:11.320 \longrightarrow 00:26:13.830$ So back to you Brenda.

NOTE Confidence: 0.8357259

 $00:26:13.830 \longrightarrow 00:26:16.842$ You know we've talked a little

NOTE Confidence: 0.8357259

00:26:16.842 --> 00:26:18.850 bit about the outpatient,

NOTE Confidence: 0.8357259

 $00{:}26{:}18.850 \dashrightarrow 00{:}26{:}20.356$ the infusion chemotherapy.

NOTE Confidence: 0.8357259

 $00:26:20.356 \longrightarrow 00:26:22.364$ Nancy mentioned that oral

NOTE Confidence: 0.8357259

 $00:26:22.364 \longrightarrow 00:26:23.870$ the rapies are covered.

00:26:23.870 --> 00:26:26.480 What about in emergent situations

NOTE Confidence: 0.8357259

 $00:26:26.480 \longrightarrow 00:26:29.748$ where patients are in the hospital

NOTE Confidence: 0.8357259

00:26:29.748 --> 00:26:33.710 and may not be having these in-depth

NOTE Confidence: 0.8357259

 $00:26:33.710 \longrightarrow 00:26:35.875$ conversations with their physician

NOTE Confidence: 0.8357259

00:26:35.875 --> 00:26:39.627 about how much this is going to cost?

NOTE Confidence: 0.8357259

 $00:26:39.630 \longrightarrow 00:26:42.570$ Do these programs cover patients

NOTE Confidence: 0.8357259

 $00:26:42.570 \longrightarrow 00:26:44.334$ in that situation?

NOTE Confidence: 0.8357259

00:26:44.340 --> 00:26:45.568 And if not,

NOTE Confidence: 0.8357259

 $00:26:45.568 \longrightarrow 00:26:49.312$ how do they deal with that on top of an

NOTE Confidence: 0.8357259

 $00:26:49.312 \longrightarrow 00:26:51.140$ overwhelming cost of hospitalization?

NOTE Confidence: 0.8788957

 $00{:}26{:}53.290 \dashrightarrow 00{:}26{:}56.856$ A lot of the programs are geared towards

NOTE Confidence: 0.8788957

 $00:26:56.856 \longrightarrow 00:26:58.640$ the outpatient ambulatory status,

NOTE Confidence: 0.8788957

 $00{:}26{:}58.640 \dashrightarrow 00{:}27{:}01.466$ where MAP can essentially interfere

NOTE Confidence: 0.8788957

 $00{:}27{:}01.466 --> 00{:}27{:}04.748$ or give some advice.

NOTE Confidence: 0.8788957

 $00:27:04.748 \longrightarrow 00:27:07.807$ If there is already a discharge

00:27:07.897 --> 00:27:11.193 plan and we need to look ahead for

NOTE Confidence: 0.8788957

 $00:27:11.193 \longrightarrow 00:27:13.289$ that treatment course when there

NOTE Confidence: 0.8788957

 $00:27:13.289 \longrightarrow 00:27:15.404$ is a hospitalization already taken

NOTE Confidence: 0.8788957

00:27:15.404 --> 00:27:17.819 place and it requires treatment,

NOTE Confidence: 0.8788957

 $00:27:17.820 \longrightarrow 00:27:20.478$ there may be other financial assistance

NOTE Confidence: 0.8788957

 $00:27:20.478 \longrightarrow 00:27:23.230$ that can go through billing too.

 $00:27:24.538 \longrightarrow 00:27:26.718$ But the manufacturing programs are

NOTE Confidence: 0.8788957

00:27:26.718 --> 00:27:28.904 essentially here to our outpatient

NOTE Confidence: 0.8788957

 $00:27:28.904 \longrightarrow 00:27:30.984$ infusion status with the oral

NOTE Confidence: 0.8788957

 $00{:}27{:}30.984 \dashrightarrow 00{:}27{:}33.524$ medications going towards the pharmacy

NOTE Confidence: 0.8788957

 $00{:}27{:}33.524 \dashrightarrow 00{:}27{:}35.159$ medication assistance program.

NOTE Confidence: 0.8788957

 $00:27:35.160 \longrightarrow 00:27:37.560$ So there is a difference there

NOTE Confidence: 0.8788957

00:27:37.560 --> 00:27:40.703 when it comes to an inpatient and

NOTE Confidence: 0.8788957

 $00{:}27{:}40.703 \dashrightarrow 00{:}27{:}43.128$ outpatient and who is eligible

NOTE Confidence: 0.8788957

 $00:27:43.128 \longrightarrow 00:27:45.720$ for these types of programs.

NOTE Confidence: 0.8788957

 $00:27:45.720 \longrightarrow 00:27:47.560$ So Nancy, what

 $00:27:47.560 \longrightarrow 00:27:50.242$ advice do you have for patients

NOTE Confidence: 0.8652998

 $00:27:50.242 \longrightarrow 00:27:53.102$ who might be facing

NOTE Confidence: 0.8652998

00:27:53.102 --> 00:27:55.066 a cancer diagnosis and

NOTE Confidence: 0.8652998

 $00:27:55.070 \longrightarrow 00:27:56.560$ might be worried

NOTE Confidence: 0.8652998

 $00:27:56.560 \longrightarrow 00:27:58.050$ not only about their cancer,

NOTE Confidence: 0.8652998

 $00:27:58.050 \longrightarrow 00:28:00.200$ but also about the cost?

NOTE Confidence: 0.8652998

 $00:28:00.200 \longrightarrow 00:28:01.310$ What should they do?

NOTE Confidence: 0.86008865

00:28:01.310 --> 00:28:04.246 My greatest advice would be to become

NOTE Confidence: 0.86008865

 $00:28:04.246 \longrightarrow 00:28:06.709$ as informed as you possibly can.

NOTE Confidence: 0.86008865

00:28:06.709 --> 00:28:09.479 Know the names of your drugs you're getting.

NOTE Confidence: 0.86008865

 $00:28:09.480 \longrightarrow 00:28:12.443$ Get on to those websites, see what their

NOTE Confidence: 0.86008865

 $00:28:12.443 \longrightarrow 00:28:13.927$ patient assistance programs offer.

NOTE Confidence: 0.86008865

00:28:13.930 --> 00:28:15.410 Talk with your physicians,

NOTE Confidence: 0.86008865

00:28:15.410 --> 00:28:17.958 their nurses, their front desk staff.

NOTE Confidence: 0.86008865

00:28:17.958 --> 00:28:20.670 And hopefully then they can actually

NOTE Confidence: 0.86008865

 $00{:}28{:}20.756 \dashrightarrow 00{:}28{:}23.115$ assist and know what they are able

 $00:28:23.115 \longrightarrow 00:28:25.745$ to get up front and know that there

NOTE Confidence: 0.86008865

 $00{:}28{:}25.745 \dashrightarrow 00{:}28{:}28.584$ is a way and a safety net for them

NOTE Confidence: 0.86008865

 $00:28:28.584 \longrightarrow 00:28:31.056$ when those bills do come in to

NOTE Confidence: 0.86008865

 $00:28:31.056 \longrightarrow 00:28:32.848$ avoid this financial toxicity.

NOTE Confidence: 0.86074

 $00:28:33.400 \longrightarrow 00:28:35.445$ Nancy is associate

NOTE Confidence: 0.86074

 $00{:}28{:}35.445 {\:{\circ}{\circ}{\circ}}>00{:}28{:}37.081$ director of oncology pharmacy

NOTE Confidence: 0.86074

 $00:28:37.081 \longrightarrow 00:28:38.959$ services for the Smilow network.

NOTE Confidence: 0.86074

 $00:28:38.960 \longrightarrow 00:28:40.940$ And Brenda Sepulveda is medication

NOTE Confidence: 0.86074

 $00{:}28{:}40.940 \dashrightarrow 00{:}28{:}42.128$ assistance program coordinator.

NOTE Confidence: 0.86074

00:28:42.130 --> 00:28:43.726 If you have questions,

NOTE Confidence: 0.86074

 $00{:}28{:}43.726 \dashrightarrow 00{:}28{:}45.322$ the address is canceranswers@yale.edu

NOTE Confidence: 0.86074

 $00:28:45.322 \longrightarrow 00:28:47.519$ and past editions of the program

NOTE Confidence: 0.86074

 $00{:}28{:}47.519 \dashrightarrow 00{:}28{:}49.529$ are available in audio and written

NOTE Confidence: 0.86074

 $00{:}28{:}49.592 \dashrightarrow 00{:}28{:}51.269$ form at yale cancercenter.org.

NOTE Confidence: 0.86074

00:28:51.270 --> 00:28:54.182 We hope you'll join us next week to

 $00{:}28{:}54.182 \to 00{:}28{:}57.025$ learn more about the fight against

NOTE Confidence: 0.86074

 $00{:}28{:}57.025 \dashrightarrow 00{:}29{:}00.067$ cancer here on Connecticut Public Radio.
